

**Estimated update process time should be about 60 minutes. During this update, SYNC will reboot automatically, please do not remove the USB.**

Due to large files.

Estimated time

**NOTE:** Time can change depending on the SYNC software in your vehicle.

Time might be different depending in the software level in the vehicle.

Vehicle can still be driven but some SYNC functions will remain unavailable until update completed.

All SYNC, Climate Control, and Audio functions will be available during installation, but there will be limited navigation capability.

**Prerequisites**

- SYNC Software Version is 3.0 or higher. You can visit [www.owner.Ford.com](http://www.owner.Ford.com) or [www.owner.Lincoln.com](http://www.owner.Lincoln.com) to download the latest software or visit you dealer
- A USB Map Drive with loaded licenses specific to this vehicle.
- Vehicle is in a well ventilated area.
- Vehicle fuel level is adequate to run for over an hour.
- Ensure vehicle is running.

**NOTE:** Some vehicles are equipped with an “Automatic Engine Shutdown” option and due to the length of time for the update process this feature should be Disabled. You can find this feature on the left hand cluster display (use left hand switch Control → Settings → Vehicle → and uncheck the box  next to “Auto Engine shutdown”). For more details, refer to your owners manual “Starting and Stopping the Engine” section for information on how to disable this feature.

**Map Software Update Install Procedure**

**1** Insert the USB Drive with loaded licenses specific to the vehicle into the vehicle’s USB port. Follow SYNC screen prompts.

**Note:** If this software update is interrupted during the installation process the update will need to be restarted from the beginning. Some functions will remain unavailable until update is completed.

**2** USB Drive is inserted into the vehicles USB connector.

**3** System update validates and starts loading.

SYNC will auto reboot after few seconds. If you have MY16 vehicle, you might see a navigation fault through steps 4, 5, & 6. Please ignore and continue with the update

**4** Screen notes changes that will be performed, duration of time and features that will not be available during the update process.

**60**  
MINUTES  
Estimated total

**Next**

**5** Last opportunity to exit Map Update before installation

**Map update not performed**

**No**

**Yes**

**6** SYNC software update will continue for approximately the next 60 minutes.

**7** SYNC software update continues after auto reboot.

**8** SYNC update is complete and an ignition key cycle is required before the updates will take effect. Remove the USB Drive and perform an ignition key cycle.

**Map update complete**

- ignition key cycle
- Engine Off / Stop
  - Wait 15 seconds
  - Engine Run / Start

**TROUBLESHOOTING**

Error	Possible cause	Possible solution
SYNC must be updated before this map update can be applied. Please remove the USB drive.	SYNC Software version is 1.0	Update SYNC software to 3.0 and try again
Installation error. This SYNC software is not compatible with the installed SYNC hardware on the vehicle.	SYNC Software version is 2.0	Update SYNC software to 3.0 and try again
